Chiltern ('tʃɪltən). Also 6 chylturne, chiltorne, 8 chilturn. [*Ciltern* occurs as a proper name in the OE. Chron. anno 1009; but also, since 16th c., applied to a kind of soil or country. This may be from the proper name, though the converse is also possible; at present no explanation of the word is known.]

1. Proper name of a range of hills, in some parts wooded, which extend from the south of Oxfordshire, near Wallingford, quite across Buckinghamshire into Bedfordshire and Hertfordshire.

a 1125 *O.E. Chron.* (Laud MS.) an. 1009 Ða æfter middan wintra hi namon þa ænne upgang ut þurh Ciltern, and swa to Oxneforda. 1747 CARTE *Hist. Eng.* I. 483 The woodlands on the edge of Bucks and Hertfordshire, called the Chiltern.

2. ***Chiltern Hundreds***: a name given to five (or more strictly four and a half) hundreds in Oxfordshire, and three in Buckinghamshire, which contain the Chiltern Hills. The manorial rights of these belonged to the Crown, which appointed over them Stewards and Bailiffs. These offices have long been obsolete or merely nominal, but that of the three Buckinghamshire hundreds (Stoke, Desborough, and Burnham) is the best known of several fictitious offices, now used for a special purpose. No member of parliament is by law at liberty to resign his seat, so long as he is duly qualified; on the other hand, a member who accepts an office of profit under the Crown must vacate his seat, subject to re-election. A member desiring to resign therefore applies for the ***Stewardship of the Chiltern Hundreds***, or other similar appointment, which is, by a legal figment, held to be such an office; the appointment necessitates his resignation, and, having thus fulfilled its purpose, is again resigned, so as to be ready for conferment upon the next member that wishes to make the same use of it.

The holding of an office of profit under the Crown became a disqualification in 1707. It was not till 1740 that the Stewardship of a royal manor was used in order to create a disqualification. In that year Sir Watkin Wynn took the Stewardship of H. M. Lordship and Manor of Bromfield and Yale (which was again taken in 1749). In 1742 Ld. Middlesex took the Head Stewardship of H. M. Honour of Otford in Kent. In Jan. 1750-51 John Pitt, M.P. for Wrexham, took the Stewardship of the Chiltern Hundreds, which has come to be the ordinary form, except when a second resignation takes place before this is vacant.

chime (tʃaɪm), *sb.*[1] Forms: 3–4 chymbe, chimbe, 4–6 chyme, 4, 7 chim, 5 chymme, (6 cheyme, cheime), 4– chime. [This and the verb of same form are of somewhat obscure history; but they were evidently derived in some way from L. *cymbalum* CYMBAL, in OE. *cimbal*, *cimbala*, which would naturally give a ME. **chimbel*, **chimble*. Cf. also MHG. *zimbel*, *zimel* m. and n., *zimbele* f. 'a small bell struck with a hammer.' But while ME. *chimbe*, *chime*, *chim* agrees with the first part of *chimbel*, the loss of the latter part is not clearly accounted for (cf. however *much*, *lite*, *badde*, from *muchel*, *litel*, *bæddel*). *Chimbe* may however have been from OF.: Godefroy has a single instance of *chinbe* = cymbal. As to the passages in which 'cymbal' is expressed by *chymbe belle*, *chymme belle*, these may indicate that a ME. **chimbel* was thus popularly understood and divided, making *chimbe* or *chim* a distinct word; but, on the other hand, if *chimbe* or *chim* already existed, the analysis of *chimbel* as *chimbe bell* would be equally natural. The following are the instances in question:

(and mod.F.) *cheminée* fireplace, and chimney, corresp. to It. *cam(m)inata* fireplace, room with a fireplace:—late L. *camīnāta*, deriv. of L. *caminus* 'furnace, forge, oven'. Pliny (*H.N.* XVII. xi) has *fossūra camīnāta* 'hole dug out oven-shape, wider below'. *Caminata* as sb. occurs in a Frankish document anno 584 'solarium cum caminata'. From the persistence of the medial *i* in OF. it is seen that the word was not an ancient popular word, but a very early adoption of *caminata* with subsequent phonetic evolution. As the usual sense in med.L. is 'room with a fireplace', it is assumed that this was short for *camera caminata*. The sequence of senses as seen in It., Fr., and Eng. is 'room with a fireplace', 'fireplace', 'smoke-vent over a fireplace'.]

II. *China porcelain, China-ware, china.*

[Throughout India, and the East generally, the Persian name is widely diffused as *chīnī*, in the sense of 'porcelain', 'china-ware'. From India this form and use of the word was prob. introduced in the 17th c. into England, whence the spellings 17th c. *chiney, cheny, cheney, chenea*, mod. dial. *chainy, chaney, chany, chaynee, chayney, cheenie, cheeny*, and the fashionable pronunciation of the 18th and the beginning of the 19th century, ('tʃeɪnɪ) (see Walker), which with ('tʃiːnɪ), still survives in the dialects.]

3. A species of earthenware of a fine semi-transparent texture, originally manufactured in China, and first brought to Europe in the 16th c. by the Portuguese, who named it *porcelain*. Early in 18th c. it began to be manufactured in Europe.

a. *China-ware* (which naturally occurs earlier than *china*) had at first the literal sense of 'ware from China'. This was soon shortened to *china*, and as the shortened form became gradually the common name of the material, 'china-ware' came to be regarded as 'ware made of china or porcelain', the sense it now bears.

chine (tʃaɪn), *sb.*[2] Also 4–7 chyne, (7 chein, chaine). [Aphetic f. **achine*, for OF. *eschine* (mod.F. *échine*) spinal column, back-bone (11th c. in Littré), corresp. to Pr. *esquina*, *esquena*, Sp. *esquena*, It. *schiena.*

For the Romance word Diez suggests an adoption of OHG. *scina*, MHG. *schine*, which, among other things, meant 'needle, splinter,' perh. originally 'small piece of bone or metal'. The transition of sense would be parallel to that of L. *spina*, prickle, fishbone, backbone, and Ger. *grat*; the difficulty being the want of evidence, either in German or Romanic, for this transition. (Scheler *Anhang*, to Diez quotes from an It.-Ger. Gloss. in Mussafia 'schena, *schinpein*' shinbone, which may be thought to show some approximation.)]

chink (tʃɪŋk), *sb.*[1] [f. chink *v.*[1]; = northern kink.] A convulsive gasp for breath, or spasmodic losing of the breath, as in hooping-cough; a convulsive fit of coughing or laughing.

chink (tʃɪŋk), *sb.*[2] Also 6 chynk(e, chincke, 7 chinke. [This and its verb, chink *v.*[2], are known only from the 16th c. There is nothing similar in Teutonic or Romanic.

In sense, *chink* is exactly equivalent to the earlier word chine (sb[1].), and indeed its earliest known occurrence is in Berthelet's ed. of a work, where it has been substituted for *chine*, *chynne* of earlier MSS. and edd. And, although 'chynes and chynkes' occurs in 1545-64, it may be said that, generally, *chink* took the place of *chine*, between 1550 and 1580. It thus looks like a new formation on *chine*; but no satisfactory account of its origin can at present be offered. If *chinch*, chinse, is, as it appears to be, a variant of the verb, the whole may have to be referred to an earlier date.

Professor Skeat thinks it 'formed with an added *k* expressive of 'diminution'; but examples of this process in 15-16th c. are not known.

Wedgwood would identify it with chink[3], with the root notion of a sharp shrill sound, as in the chink of metal, and thence derive the sense of sudden fissure or fracture accompanied by such a sound. He compares the development of crack, 'sharp report' and then 'fissure', and of other words, in which actions are instinctively expressed by their associated sounds. (Cf. e.g. *bang*, *bomb*, *bum*, *chap*, *clap*, *pop*.) But the historical data are too scanty to establish this.]

chirne, obs. form of CHURN.

chiro-, chir-, = Gr. χειρο- combining form of χείρ hand, appearing in Greek in a very large number of words; several of these were adopted in Latin with the spelling *chiro-*, e.g. *chīrographum*, *chīromantia*, *chīronomia*, *chīrothēca*, *chīrūrgia*, and have thus passed into the modern langs.; many more have been taken by these directly from Greek, e.g. *chirocracy*, *chiroscopy*, *chirosophy*, *chirotechny*, or formed from Greek elements and on Greek analogies, as *chiropodist*, *chirosopher*. In modern technical terms, esp. those of botany and zoology, the spelling is often *cheir-*, e.g. *cheiranthus*, *cheiroptera*, *cheirotherium*.
In words thoroughly naturalized in Latin, CH was treated as C, and had in Romanic the phonetic history of *c* before *i*: hence such medL. forms as *cirographum*, *cirogryllus*, *cirotheca*, *ciromancia*, *cirurgianus*, also written *cyro-*, and It. and OF. and Eng. forms in *ciro-*, *cyro-*. But, in most words, modern scholarship has restored the *ch-* spelling and *k* pronunciation: see however CHIRURGEON, SURGEON.
The more important of these derivatives follow in their alphabetical order; a few trivial ones are given here: **ˌchirocos'metics** *sb. pl.* [Gr. κοσμητικός; see COSMETIC], the art of adorning the hands. †**'chirogram** [see -GRAM], used by Bulwer for a diagram illustrating chironomy. **chiro-'gymnast** [Gr. γυμναστής; see GYMNAST], an apparatus for exercising the fingers for pianoforte playing. **'chiromys, cheiromys** [Gr. μῦς mouse], the AYE-AYE of Madagascar. **'chiroplast** [Gr. πλάστης moulder, modeller], an apparatus devised by J. chiropodist (kaɪ'rɒpədɪst). [A factitious designation, apparently assumed in 1785: see first quots. Whether the inventor put together Gr. χείρ, χειρο- hand, and *and* feet were the objects of his attention, or whether he had in view the ready-made Gr. χειροπόδ-ης (or χειρόπους, χειρόποδ-) 'having chapped feet', does not appear. The latter would better justify his formation, the former better suit his meaning.

Gr. χειρόποδ- is founded on χειρ-άς a chap, properly of the hands (χείρ) but also of the feet (χειράδες ποδῶν).]

chirr (tʃɜ:(r), tʃərr, *dial.* and *Sc.* tʃɪrr), *v.* [A modern formation naturally expressing a prolonged and somewhat sharply trilled sound: cf. *whirr*, *birr*, *burr*, *purr*; with *chirring* cf. the more ponderous *jarring*. As a recent onomatopœia, *chirr* was evidently largely suggested by the already existing *chirm*, *chirk*, *chirt*, *chirp*, *chirrup*, of which it retains the common phonetic element and the common kernel of meaning.

Along with the subsequently formed *chirl*, and the many derivatives of *chirp*, etc., these form a well-marked recent group or 'family' of words, which mutually illustrate and help each other's meaning. Thus *chirr* expresses continued and uniform trilled sound; in *chirk*, *chirt*, *chirp* this sound is abruptly stopped by oral action; in *chirrup*, a modulation is introduced before the stoppage; *chirl*, esp. in its northern form *chirr'l*, suggests the passing of the *chirr* into a warbling modulation; while *chirm* with its suggestions of verbal sbs. in *-m* of divers origin, e.g. *scream*, *bloom*, *blossom*, *rhythm*, *spasm*, assumes the appearance of a derivative of *chir-*. If these words, instead of being nearly all recent, were of prehistoric formation, or of Aryan standing, *chir-* would certainly be assumed as the 'root', and the other words as out-growths from it.]

intr. To make the trilled sound characteristic of grasshoppers, etc. (Often nearly equivalent to CHIRP, but properly expressing a more continuous and monotonous sound.) Hence **chirring** *vbl. sb.* and *ppl. a.*

chirrie, obs. form of CHERRY.

chirrup ('tʃɪrəp), *v.* Forms: 6 cherip, 7 cherrip, cherrup, 7–9 cherup, 7– chirrup. [Evidently formed from *chirp*, by trilling the *r*, and developing an additional syllable, to indicate a corresponding variation of sound. But it was thus brought into phonetic association with *cheer*, *cheerful*, *cheer up*, which have acted powerfully upon its sense-development, so that *chirrup* now conveys a more sprightly or cheery notion than *chirp*.]

1. a. A cutting tool of iron or steel with the cutting face transverse to the axis, and more or less abruptly bevelled on one or both sides; used for cutting wood, metal, or stone, and worked either by pressure, or by the blows of a mallet or hammer.

The ordinary carpenter's chisel has a wooden handle, and a plane face at right angles to the axis, bevelled on one side only; most of the stone-cutters' chisels are bevelled on both sides (or rarely on four sides); some chisels, as the gouge, have the plane of the face curved; others, used in turning, have the edge concave or convex.

It reappears in Bailey's Dict., 1721–31, as a word of Spenser and Chaucer. Johnson 1755 has it merely as a Spenserian word 'now out of use'. The early pronunciation as shown copiously in alliterative verse was (as in OF.) with (tʃ-); since its revival it is more generally pronounced with (ʃ-), as if from modern French (where it is not found).]

chive (tʃaɪv), *sb.*[1] Also cive (saɪv). Forms: 5 cyves, -ys, 5–7 cyve, 6 chyve, 6, 8 sive, (9 shive), 6– chive, cive. [In form *cive* a. F. *cive* = Pr. *ceba*:—L. *cēpa*, *cæpa* onion. The form *chive* prob. represents a North Fr. *chive*. (Cf. *rive*:—*ripa*; *cire*:—*cera*.) It is probable that sense 2 is orig. the same word, though it never appears as *cive*, and early writers who regularly used *cive* for the plant, employed *chive* in sense 2.

In OE. *cipe*, a. L. *cēpa*, still retained the sense 'onion' (also that of 'shalot' or 'scallion'); but in Romanic the name was extended and transferred to smaller species of *Allium*. In French, *cive* included (or perhaps still includes) 'several small species or varieties', besides *A. Schœnoprasum*, to which the dim. *civette* (in Cat. *cebeta*) applies more exclusively. In Eng. *cive* or *chive* appears always to have meant this, *civet* being merely a rare, and now obsolete synonym. In French it is also called *ciboulette*, dim. of *ciboule* CHIBOL. Other OF. derivative forms were *civol*, *civon*, *civot*. The form *chive* is not recorded by Littré, but its existence in ONFr. may be inferred from the derivatives *chivon*, *chivot* (Godefroy). In Eng. *cive* and *chive* both occur from early times; but the former is the leading form, down to the present century. The phonetic corruption *siethe* used by Tusser, and interesting as exemplifying the interchange of *v* and ð, is still in familiar use in the south of Scotland. The modern prevalence of *chive* in the leading form is, perhaps, due to association with CHIVE *sb.*[2], arising from the fact that it is for its slender leaves that the *chive* is cultivated. *Chived garlic* in 3 clearly points to this.]

1. The smallest cultivated species of *Allium* (*A. Schœnoprasum*), which grows in tufts, with rush-like hollow leaves and small clustered bulbs. The leaves are cut for use in soups and stews. *wild chive*: a name sometimes applied to the Wild Garlic or Ramsons (*A. ursinum*).

The name was taken as a specific one by Werner in 1789. In 1838 Von Kobell showed that Werner's name included more than one species, and restricted it to the hexagonal chlorite of St. Gothard, from which he separated *Ripidolite*: various other species have since been established, as *Penninite*, *Delessite*, *Leuchtenbergite*, *Clinochlore*, *Chloritoid*, etc., and as 'chlorite' has thus become a vague popular term, Dana has given the name of *Prochlorite* to the St. Gothard mineral on which Werner founded the species.

chock-full, choke-full ('tʃɒkfʊl, 'tʃəʊkfʊl), *a.* Forms: 5 **chokke-fulle**, (**cheke-full**), 8 **chocque-**, 7– **choke-**, 8– **chock-**, **choak-**, **chuck-full**. [The phonetic form and spelling and the derivation are alike unsettled, the uncertainty of the latter involving that of the former. In Dictionaries, first in Todd (1818) as *choke-full* (with mention of *chuck-full* as a 'corruption'). Subsequent dictionaries have *choke-full* as main form, with *chock-full* as a recognized variant. But the American lexicographers have *chock-full* as the standard form, with *choke-full* as a cross-reference; and this appears to agree with literary usage in U.S. *Choke-full* appears to be rather the more frequent in literary use in England; but *chock-full* is almost universal in spoken use; *chuck-full*, in literary use bef. and after 1800, is now only dialectal.

The uncertainty begins with the first appearance of the word as *chokke-fulle*, *cheke-fulle* in the alliterative Morte Arthur, the spelling of which is very insecure. Conjectural derivations are from CHOKE *v.* (ME. *choke*, *cheke*) with sense 'full to choking', or 'choked full'; from CHEEK (ME. *cheke*, CHOKE *sb.*[2]) or the related *chokes* = chops, fauces, with sense 'full to the chops'; from ME. CHOK, *chokke* ? to thrust, ram in, in sense 'crammed full'. Either of the two former derivations would give an original long *ō* (which might perhaps, however, be shortened in the combination); the third would give short *ŏ* from the beginning. Prob. there is a recent association with CHOCK *sb.* and *v.*, in some of their senses, but the latter are too late to be the origin; it is more likely that these senses have been developed under the influence of *chock-full*: see CHOCK *adv.* In Eng. dial. glossaries, *chock-full* is recorded from Lancashire, Cheshire, Sheffield, Whitby, Holderness, Leicester, Warwicksh., Worcester, Berks, Kent; and correspondents send it as the current form in Cornwall, Somerset, Wilts, Surrey, Warwicksh., Staffordsh., Derby, Notts, E. & S. Lincoln, Rossendale, Westmorland, Durham, Northumberland, Scotland, 'all parts of Ireland', and 'among all English soldiers in the army'. *Chuck-full* is in the Holderness Gloss., and is reported from Norfolk, Suffolk, E. London, Oxford, N. & E. Devon, and in the U.S. *Choke-full* appears to have no local status. As the local pronunciation is usually entirely distinct from that of *choke* (*choăk*, *chooăk*, *chowk*, etc.), the two words are not associated, and app. have nothing to do with each other; *choke-full* being thus merely a book-spelling founded upon a conjectural derivation.]

choil. *Cutlery.* The name of the indentation in a pocket-knife where the edge of the blade adjoins the 'tang' or thick part by which it is hafted; or the corresponding part of any knife where the cutting edge ends. Choil has been used in Sheffield from before the memory of the oldest inhabitant: it is also in use in cutlery establishments in U.S. (*N. & Q*, 7th S. VII. 197, 1889).

choke, *sb.*[2] *Obs.* or *dial.* Forms: plural, 4 chokes, chookes, 5 *Sc.* chokkeis, 8–9 *Sc.* chouks, chowks, *dial.* chokes, chucks. [Of uncertain relations: in some cases prob. merely a variant of CHEEK; but mod.Sc. *chowk* (tʃʌuk) suggests ON. *kjálki* jaw-bone.] The fleshy parts about and under the jaws; the chops.

choke (tʃəʊk), *v.* Pa. t. and pple. choked (tʃəʊkt). Forms: 4–5 cheke, [chekyn], 5– choke, (6 schoke). Also 6–9 **choak**(e; occas. 6–9 (esp. in *mod. dial.*) chock, 6 chouke, 9 *Sc.* chouk, chowk, 9 *dial.* chuck. Rare str. pa. pple, in 7 choaken. [The early history is obscure, the word being comparatively rare. The ME. variation *choke* and *cheke*, also found in ACHOKE, *acheke*, points back to an OE. **céocian*, *acéocian*, of which the latter only is exemplified (Ælfric, *Hom.* I. 216). Possibly therefore *choke* is an aphetic form of *achoke*. No cognate verb appears elsewhere in Teutonic: but connexion with CHEEK *sb.* is perh. possible, at least if the latter had an OTeut. type **keukôn-*, since *acéocian* would also represent a stem **keuk-*. (The meaning of *céoc-ádl* in *Leechd.* II. 310 is doubtful: ? *cheek-* or *choke-*illness.)

Association between the two words is suggested by the ME. double form of both, *cheke*, *choke*; in mod. Sc., *chouk* to choke, and *chouks* chops, fauces, external parts about the top of the throat (see CHOKE *sb.*[2]), are always associated in sense. The possibility of such a derivation is further illustrated by the verbs ATHROAT, THROTTLE, G. *erdrosseln*, L. *jugulare*, and by *querken*, given by the Promptorium as a synonym of *choke*: 'chekyn or qwerchyn (*v.r.* querken) *suffoco*; chekenyd or qwerkenyd (chowked or querkened) *suffocatus*, *strangulatus*.' This *querken* to strangle or choke is a deriv. of ON. *kverk*, OHG. *querca*, the angle below the chin, in pl. throat, fauces, = Sc. chouks.

The normal ME. repr. of **céocian* was *cheke*; *choke* is explained by passage of OE. *céo-* into *cēō-*; cf. *céosan*, ME. *chose*, CHOOSE. The form *Cheken* in the Promptorium (see above), appears to be a derivative with *-en* suffix, like *cheapen*, *threaten*.]

I. *proper.* To stop the aperture of the throat so as to prevent breathing; to kill by so doing.

1. *trans.* To suffocate by external compression of the throat; to throttle, strangle; to produce a sensation of strangling. (Still the ordinary word for this sense in Scotland.)

App. (as stated by Celsus A.D. 50) f. χολή bile, though the formation is obscure and the derivation disputed; another sense of χολέρα was rain-pipe, gutter. With Celsus and Pliny, L. *cholera* retained the same sense as in Gr.; but in 3rd and 4th c. it was used by Lampridius and Jerome in the sense of Gr. χολή 'bile', also 'bitter anger,' and became the ordinary name of one of the 'four humours' of the physicians (*sanguis*, *cholera*, *melancolia*, *phlegma*), as in Isidore. In this sense alone the word survived in Romanic, It. *collera*, Pr. *colera*, *colra*, OF. *colre*, *colle*, *cole*, bile, anger. The last has been superseded in Fr. by *colère*, a re-adaptation of the L. word, of learned origin. Both Fr. types appear in late ME., where also the word appears to have been sometimes confused with *colour*, esp. in its association with *red*. In the 16th c. the spelling was refashioned after the original Latin.]

3. A malignant disease (not of bilious nature), endemic in India and from time to time epidemic in other parts of the world. It is characterized by violent vomiting, purging with watery rice-coloured evacuations, severe cramps, and collapse, death often occurring in a few hours.

(A terrible outbreak of this disease began in India in 1816-17, and, extending year by year over an increasing area westward, at length reached Europe in 1831 and N. America in 1832. After rivalling the great pestilences of former ages in the mortality which it produced, it abated, or retreated back to India, after 1837.)

In earlier use, and sometimes still, distinguished as *Asiatic, catarrhal, epidemic, Indian, malignant, Oriental, serous*, and *spasmodic cholera*; but since its first invasion of England in 1831-2 this disease has more and more appropriated the simple name.

cholera morbus, which originally belonged to sense 2 to distinguish it from sense 1, has also been in modern times vulgarly used to distinguish this from sense 2.

choose (tʃu:z), *v.* Pa. t. chose (tʃəʊz), pa. pple. chosen ('tʃəʊz(ə)n). Forms: see below. [OE. *céos-an*, str. vb., belonging to the OTeut. ablaut-series *eu*, *au—u*, *u*. By reason of internal consonant-mutation (*s* to *z* and *r*), in OTeut. and WGer., and by OE. palatalization of *c*, the inflexion of this vb. presented, in the OE. and early ME. stages, various phonetic differences, which were subsequently levelled under the influence of analogy; while new phonetic or analogical influences changed the present and past stems in various directions, so that not one of its modern forms is the normal phonetic representative of the corresponding OE. form. The OTeut. inflexion was *keus-*, *kaus—kuzum*, *kuzano-* (with original *s* changed to *z* by Verner's Law), Gothic *kius-*, *kaus—kusum*, *kusans*; in WGer. with development of *z* to *r*, *kios-*, *kaus* (OS. and OHG. *kôs*)*—kuri—kurum*, *koran*, whence OE. *céosan*, *céas—cure—curon*, *coren* (with *c* palatal in *céosan*, *céas*, but guttural in *cur-*, *cor-*). Hence regularly in ME., *cheose* (*chēse*, with close *ē*), *cheas* (*chēs*, with open *ē*)— 2 sing. *cure*,—pl. *curen*, *coren*. The first change upon this was the levelling of the consonant differences in the pa. pple. *coren*, which (though retained as *corn*, *core*, in s.w. dial. to 15th c.) was by 1200 assimilated to the general consonantism of the vb. as *chosen* (perh. through an intermed. *choren*: cf. *chure* in 2 s. pret.); this was subseq. often reduced to *chose*, but the full form is the survivor. By assimilation to this the pl. pret. *curen* became *chosen*, and in due course *chose*, still used. The prevalent ME. form of the pret. sing. was *chēs*; but there was also *chās*, app. repr. OE. *cēas*, for *céas*. In later ME., and esp. in north. and n. midl. dial., these were also used for the pl.; and by similar levelling the pl. *chose* was also used as sing., app. only after 1500, and is now the standard form. In the pres. stem, OE. *céose*, early ME. *chéose*, normally gave *chēse*, *cheese*, which survived to *c* 1500, and later in Sc. But a type *chōse* appears in the 14th c. and lasted till *c* 1575 (in More, Coverdale, Ascham); before 1550 the type *choose* is found. Probably ME. *chōse* represented OE. *cēōse*, for *céose*, and regularly passed into *choose*: cf. *lose*, in later pronunciation (lu:z). The chief difficulty attaches to the type *chuse*. This was no mere variant spelling of *choose*, but a much earlier form, which occurs somewhat sporadically in ME., but became very frequent in 16th c. (when it rimed with *amuse*, *refuse*, *excuse*). *Choose* and *chuse* are used indiscriminately in the Bible of 1611 and the First Folio of Shakspere: *chuse* was by far the prevailing form in 17–18th c., but has in the 19th been gradually superseded by *choose*, which Dr. Johnson, following Bailey, took as his leading Dictionary form, although in his own practice he appears to have spelt *chuse*.

(All other words in *-use*, as *abuse*, *accuse*, *amuse*, *refuse*, *ruse*, are of Fr. origin; and in some Sc. dialects *chuse* has still the sound of Fr. *u*. Of OF. *choisir*, Littré gives Picard forms *keusir*, Walloon *chûzî*, Rouchi *chusir*.)

On these various types of the present stem were formed weak types of the pa. t., *chesed*, *chosed*, *choosed*, *chused*, used alongside of the various strong forms already mentioned; none of them are now recognized in standard English, though some exist in the dialects. Perhaps these were in some measure due to a tendency to identify the Eng. verb with the F. *choisir*—a tendency which is distinctly marked in the rise of the by-form CHOISE, *choised*, formerly used in English, and still the ordinary word for *choose* in the South of Scotland.]

The complicated nature of these facts makes it necessary to illustrate the Forms apart from the sense-development.

chop (tʃɒp), *v.*[1] Also 4–7 choppe, (5–6 schoppe, 6 chopp, 7 chope). [Another form of CHAP *v.*[1] The evidence of the quotations as to their relative priority in date is not decisive, nor is any trace of the word in either form to be found in OE., or in the older stages of Teutonic. *Chap* coincides in sense with Du. *kappen* to chop, cut, mince, hew, lop, prune, late MDu. *cappen* to hew off, chop off, LG. (whence mod.G.) *kappen*, Da. *kappe*, Sw. *kappa* to cut, chop. But the type to which these point is **kappôn*, OTeut. **kappôjan*, and this would app. have given in OE. only **cappian*, since *a* before double stops followed by guttural vowel, did not give *æ* in primitive OE. This again would have given ME. and modern **cap*; while the OE. type of *chap* would be **ceappian*, **cæppian*. Thus, the relationship of the Eng. to the continental words cannot, at present, be made out.

Chop and *chap* were subsequently somewhat differentiated, *chop* becoming the proper word for branches I and II, while III and IV are left to *chap*. In some respects, the use of the *chop* forms, esp. in the sb. (sense 2), suggests influence of F. *couper*, in 13–15th c. often *coper*; but whether the latter had, or could have, any influence on the rise or currency of the form *chop* is problematical.]

V. In various uses this verb and the next appear to run together, and produce senses which combine the two notions of 'striking', or suddenly moving in any direction, with that of 'turning' as in the chopping of the wind. Thus a fox is said to *chop back* and double; a mineral vein *chops up, down, back*, etc.

chop (tʃɒp), *v.*[2] Also 5–7 choppe. [Appears bef. 1400 in the appellation *choppe-churche*, which implies earlier use of the vb., though the latter has been found first, in the phrase 'to choppe and change', late in the 15th c. The history is not clear, but as CHAP was of occasional earlier use in the same sense, it is not improbable that *chop* was merely a variant due to the circumstance that other words of the same form varied between *chop* and *chap*. There appears little reason to think that the Flemish *kōpen*, *koopen*, to sell, or its Eng. form *cope*, or the ON. *kaupa*, or its Sc. form *coup*, had anything to do with the origin of *choppe*. The difference between (ko:p) and (tʃɒp) is great.]

chouse (tʃaʊs), *sb.* Also 7 chiaus(e, chews, showse, 7–8 chowse. [Generally taken to be the same word as chiaus, *chaus* (so spelt about 1600), a Turkish official messenger; but the connexion of meaning is not made out.

As to the origin of the Eng. use, Gifford (1814) in a note on the quot. from Ben Jonson says, 'In 1609, Sir Robt. Shirley sent a messenger or *chiaus* to this country as his agent from the Grand Signior and the Sophy to transact some preparatory business.' The latter 'chiaused the Turkish and Persian merchants of £4,000' and decamped. But no trace of this incident has yet been found outside of Gifford's note; it was unknown to Peter Whalley, a previous editor of Ben Jonson 1756; also to Skinner, Henshaw, Dr. Johnson, Todd, and others who discussed the history of the word. Yet most of these recognized the likeness of *chouse* to the Turkish word, which Henshaw even proposed as the etymon, on the ground that the Turkish chiaus 'is little better than a fool'. Gifford's note must therefore be taken with reserve.]

chowder ('tʃaʊdə(r)), *sb.* Also 8 chouder. [App. of French origin, from *chaudière* pot. In the fishing villages of Brittany (according to a writer in *N. & Q.* 4 Ser. VII. 85) *faire la chaudière* means to supply a cauldron in which is cooked a mess of fish and biscuit with some savoury condiments, a hodge-podge contributed by the fishermen themselves, each of whom in return receives his share of the prepared dish. The Breton fishermen probably carried the custom to Newfoundland, long famous for its chowder, whence it has spread to Nova Scotia, New Brunswick, and New England.

Another writer in *N. & Q.* (1870) 4 Ser. V. 261, says 'I have frequently heard some of the old inhabitants [of Newfoundland] speak of Commodore John Elliot's chowder pic-nic in 1786, which was given in honour of H.R.H. Christianite, -tie, obs. ff. CHRISTIANITY.

Christianity (krɪstɪ'ænɪtɪ). Forms: α. 4 cristiente, 4-5 -iante, -yante, 4-6 crystyente, -yante, 5 cristiantee, 6 christiantie. β. 4-5 cristente (-ante), 5-6 crystente, 6 christente, -tie, -tee, -tye, (7 christinty, 9 *arch.* -entie, -ty). γ. 4-5 crystyanyte, 4-6 cristianite, 5 -yanite, 6 christianite, 6-7 -itie, 6- -ity. [Represents (originally through OF. *crestienté*), L. *christiānitāt-em*, noun of state f. *chrīstiān-us* CHRISTIAN; having taken the place in whole or part of the native formations ME. *cristenhode* and *cristendom.* Apart from the merely graphic refashioning of *cr-* as *chr-* at the Renascence, the word has had three types, *cristienté* the most French, *cristentie* the most English, and *christianity* the most Latinized, which might fairly be treated as distinct words, except that, being connected by intermediate links, their relations are more clearly shown by considering them together. The type *cristienté* was a direct adoption of Anglo-Fr. *cristienté*, OF. *crestienté*: see CHRISTIAN. By further assimilation to the English *cristen, cristendom*, etc. (aided probably by the phonetic obscurity of the *-ien-*), arose *cristenté*, which was the most frequent ME. type. After 1500 both types were spelt with *ch-*. Already in the 14th c., familiarity with the Latin form as a word of the clergy, led to the occasional use of the 5-syllabic *cristianite.* With the Renascence this became *christianite, -itie, -ity*, which in the course of the 16th c. entirely supplanted the two earlier forms, though *christentie* lingered dialectally, and appears as *christendie* in Burns. *Christianity* and *Christendom* were originally synonyms, but are now differentiated.]

3. A present or gratuity given at Christmas: in Great Britain, usually confined to gratuities given to those who are supposed to have a vague claim upon the donor for services rendered to him as one of the general public by whom they are employed and paid, or as a customer of their legal employer; the undefined theory being that as they have done offices for this person, for which he has not directly paid them, some direct acknowledgement is becoming at Christmas.

These gratuities have traditionally been asked from householders by letter-carriers, policemen, lamp-lighters, scavengers, butchers' and bakers' boys, tradesmen's carmen, etc., and from tradesmen by the servants of households that deal with them, etc. They are thus practically identical with the Christmas-box collected by apprentices from their masters' customers in sense 1, exc. that the name is now given to the individual donation; and hence, vulgarly and in dialect use it is often equivalent to 'Christmas present.'

church (tʃɜ:tʃ), *sb.* Forms: *α.* 1 cirice, cyrice, 2–3 chiriche, -eche, chyreche, 3 churiche (y), -eche, chereche. *β.* 1–2 circe, cyrce, 2 chyrce, (cirke), 2–6 chirche, 3–6 chyrche, cherche, (4–6 chirch, chyrch, cherch), 3–6 churche, 6 church. *Northern.* 3 *Orm.* kirrke, 4–5 kirke, kyrke, 4–6 kyrk, 4–5 kirc, 4– kirk: see KIRK. [*Church*, earlier *churche*, *cherche*, is a phonetically-spelt normal representative of ME. *chirche* (*ur* = *er* = *ir*, e.g. *birch, bird, first, chirm, churl, churn, kernel*), the regular repr. of OE. *circe*; the fuller OE. *cirice, cirice* gave the early ME. variant *chereche, chiriche*. (The form *cyrice*, often erroneously assumed as the original, is only a later variant of *cirice* (with *y* from *i* before *r*, as in *cyrs-, fyren*, etc.); *c* before original OE. *y* (umlaut of *u*) could not give modern *ch-*, but only *k-*, as in *cyrnel, cyrtel, cýre*, kernel, kirtle, ME. *kire*.)

OE. *cirice, circe*, corresp. to WGer. *kîrika*, OS. *kirika*, *kerika* (MLG. and MDu. *kerke*, Du. *kerk*, LG. *kerke, karke, kark*, with *ar:–er:–ir*); OFris. *szereke, szurke, tzierka, tziurk*; OHG. *chirihha*, also *chiriihha, chiricha, khirihha, kirihha, kiricha*, later *chircha*, in Notker *chîlihha, chîlecha, chîlcha* (MHG. and mod.G. *kirche*, in Upper Ger. dial. *kilche, chilche*); also ON. *kirkia, kyrkja*, Sw. *kyrka*, Da. *kirke* (thence Finn. *kirkko*, Esth. *kirrik, kirk, kerk*; also OPruss. *kîrkis*). Cf. also the Slavonic forms: OSlav. *crĭky*, 10th c., *crŭky* fem., later *crŭkŭve, cĭrkovĭ*, Russ. *cerkov'*, Bulg. *čerkova*, Servian *crkva*, Slovenish *cerkev*, Chekh *cirkev* (obs.), Pol. *cerkiew* (but only for 'Greek church'), Lusat. *cyrkej*.

The OE. oblique forms *cirican, -cean, circan, -cean*, present four types, **kirika*, **kirikja*, **kirka*, **kirkja*, but the two last may result from later contraction, and *-can, -cean* may mean the same thing, viz. palatal *c*. The continental German forms point to **kirika*, **kîrika*. The Alemannic forms with *l, chîlihha, kilche* are on phonetic and other grounds admitted to have arisen out of the *r* type. The ON. is generally held to be derived from OE. (in the *circean* form). Although the notion has been advanced that all the continental forms originated in the OE., in connexion with the early missionary labours of Englishmen in Germany, this is philologically untenable; and the word is held on good grounds to be common WGer., and to go back at least to the 4th or 5th c. (Long before they became Christians, the Germans were naturally acquainted with, and had names for, all the striking phenomena of Christianity, as seen in the Roman provinces, and the missions outside.) In Slavonic, the word is generally thought to have been taken from Teutonic.

The ulterior derivation has been keenly disputed. The L. *circus*, and a Gothic word *kêlikn* 'tower, upper chamber' (app. originally Gaulish) have both been proposed (the latter suggested by the Alemannic *chîlihha*), but are set aside as untenable; and there is now a general agreement among scholars in referring it to the Greek word *κῡριακόν*, properly adj. 'of the Lord, *dominicum*, dominical' (f. *κύριος* lord), which occurs, from the 3rd century at least, used substantively (sc. *δῶμα*, or the like) = 'house of the Lord', as a name of the Christian house of worship. Of this the earliest cited instances are in the *Apostolical Constitutions* (II. 59), *a* 300, the edict of Maximinus (303–13), cited by Eusebius (*Eccl. Hist.* IX. 10) *a* 324, the Councils of Ancyra 314 (Canon 15), Neo-Cæsarea 314–23 (Can. 5), and Laodicea (Can. 28). Thenceforward it appears to have been in fairly common use in the East: e.g., Constantine named several churches built by him *κυριακά* (Eusebius *De Laud. Const.* xvii).

The chief objections to this derivation of the Teutonic (and Slavonic) name are the following. The ordinary name for 'church' in Gr. was *ἐκκλησία*, and this (or *βασιλική*, BASILICA) was the name which passed into Latin and all the Romanic langs.; also, into all the Celtic langs., OIr. *eclais*, Ir. and Gael. *eglais*, Manx *agglish*, OWelsh *ecluis*, W. *eglwys*, Cornish *eglos, -es, -is*, Breton *iliz*. Hence, an *à priori* unlikelihood that any other Greek name should have passed into the Teutonic languages. Moreover, *ἐκκλησία* was actually adopted in Gothic, where as *aikklêsjô* it occurs in the N.T. many times. But as the sense here is not that of the place of public worship, but of the Christian society or assembly, it forms no evidence against the coexistence of a

Gothic repr. of κυριακόν, in the sense of the 'Lord's house'. Besides, Ulphilas, as a native of Cappadocia, born A.D. 318, belonged to the very region and time for which we have the most weighty evidence of the use of κυριακόν, as mentioned above. And as to the other Teutonic tribes, the fact is certain, in spite of its *à priori* unlikelihood, that *ecclesía* was *not* accepted by them. At their conversion, Latin Christianity would naturally have given to them, as to others, the name *ecclesia* (or *basilica*), if *kirika* had not already acquired too firm hold of the field.

There are points of difficulty in the form of *kirika* and its gender. Its identification with κυριακόν assumes the representation of Gr. *υ* by *i* in Teutonic. Ulphilas did not so represent *υ*; nor did he use *u*, but retained the Gothic letter corresponding in alphabetic place and form to Gr. *Y*, which he otherwise used for *υ* or *w*. But, before the development of umlaut, and consequent evolution of *y* as a Teutonic sound, *i* was really the nearest Teutonic sound to *υ*, and in point of fact is its usual representative. The change of grammatical form and gender has been variously explained: as εὐαγγέλιον became in Gothic a weak fem. *aiwaggêljô*, *-jôn*; so κυριακόν, if adopted in Gothic, or in the corresponding stage of WGer., would in the same way become *kYrjakô*, *-ôn*, whence regularly WGer. *-ka*, OE. *-ce*; but there are other instances in OHG. of feminines from L. *-um*, Gr. *-ον*, as *martira*, *organa*, modGer. *orgel*; and the form adopted may actually have been the Gr. pl. κῡριακά. (The use of κυριακή in Gr. appears too late to affect the question.) For the rest, a word adopted in Germanic as **kirjak-* would phonetically become **kirjik-*, and this normally in WGer *kirik-*. Possibly also **kirjika* might, by metathesis, give the **kirikja* app. required for OE. *ciricean*; but the OE. palatalization might simply be due to the prec. *i* as in *ic*, ME. *ich*, *I* pron.

The main objections are historical: we do not know the actual circumstances in which this less usual Gr. name became so well known to all the Germanic tribes as to become practically the native name, and like *austrôn-* EASTER, resist all the influence of Latin Christianity to supplant it; this too at so early a date as to be brought to Britain (with many words expressing the outward apparatus of Christianity) by the heathen Angles and Saxons. The question was discussed already in the 9th c. by Walafrid Strabo (ob. 849) in a noteworthy passage (*De Rebus Eccl.* vii), where, after giving the Greek derivation, he ascribes German knowledge and use of the word to the German mercenaries who engaged in military service under the Empire, and refers particularly to the Goths in the Greek provinces. Beside that of the Goths, two other possible channels are indicated by Hildebrand, one of which, connected with the early penetration of Christianity from the Rhone valley into the Upper Rhine, is important, as tallying with a statement of Irenæus, Bp. of Lyons in the 2nd c. (*Adv. Hær.* I. x. §2), and as explaining the proved existence of place-names like *Kiricheim*, *Chiricunuillare*, in Elsasz, etc. before the days of Boniface. But it is by no means necessary that there should have been a single *kirika* in Germany itself; from 313 onward, Christian churches with their sacred vessels and ornaments were well-known objects of pillage to the German invaders of the Empire: if the first with which these made acquaintance, wherever situated, were called κυριακά, it would be quite sufficient to account for their familiarity with the word. The Angles and Saxons had seen and sacked Roman and British churches in Gaul and Britain for centuries before they had them of their own, and, we have every reason to believe, had known and spoken of them as *cirican* during the whole of that period.

The Latin equivalent of κυριακόν, *dominicum*, was also in use at least from the time of Cyprian (*c* 200–258), in the sense of 'the house of God' *aedes sacra Domino*. To a certain extent it was adopted in Old Irish, where *domnach* (mod. *domhnach*) became a frequent name of churches. The parallelism of Gr. κυριακόν church, κυριακή Sunday (in 11th c. also 'church'), L. *dominicum* church, *dominica*, *dies dominicus* Sunday, Irish *domhnach* 'church' and 'Sunday', is instructive.

The case for the derivation from κυριακόν gains largely by the fact that no other conjecture offered will bear scientific statement, much less examination. For example, the suggestion that *cirice* might arise out of L. *crucea* (which actually gave OE. *crycc(e*, now *crutch*), or some other derivative of L. *crux*, *crucem* cross, is at variance with the simple facts of phonetic history.]

B. *Signification.*

While it results from what is stated above that *kirika*, *cirice*, was originally applied to the building, it is clear that with the conversion of the Teutonic nations, it was assumed as the naturalized equivalent of L. *ecclēsia*, and used for that word in all its senses. Naturally the first of these would be as the name of the then one great religious organization, the Catholic Church, and especially as represented by its ministers, the clergy or ecclesiastical order. The extension to other senses took place as these were practically recognized.

The history of the OE. *cirice*, or of the Teutonic *kirika*, is therefore not the history of the Church, or of its name in Christendom; this begins with the joint history of Gr. ἐκκλησία and its L. adoption *ecclēsia*; about which all that need be said here is that the Gr. word, meaning etymologically 'the body of the ἔκκλητοι or select counsellors' was the name given by Solon to the public formal assembly of the Athenian people, and hence to the similar public assemblies of other free Greek cities. By the LXX. it was used to transl. the Heb. *qāhāl* the 'congregation' or assembly of Israel met before the Lord, or conceived in their relation to him. In the N.T. the word has a twofold sense: α. (after the LXX.) the whole congregation of the faithful, the Christian Society, conceived of as one organism, the body of Christ; β. (after classical Gr.), a particular local assembly of Christ's enfranchised met for solemn purposes: in this sense it has a plural. From these arose the later developments: the name of the assembly passed to that of the building set apart for it: the sense of 'the congregation of the faithful' sought visible embodiment in outward organization, which necessarily followed the lines of provincial, national, and linguistic distinctions. Thus arose the notion of provincial or national Churches, as parts or branches of the Church universal or Catholic; and, with widening differences, doctrinal or administrative, there came the revolt of some of these from the increasingly centralized organization of the Catholic Church, and the formation of rival churches, each claiming to be *the* church and rejecting the claim of the others. Thus arose the first great division of the Eastern and Western Church, the later separation of various national 'reformed' churches from the unreformed Western Church in the 16th c., the secession of various 'free' or 'voluntary' churches from the reformed national or 'established' churches in later times. Some of these voluntary bodies have refused the name of 'church' to any 'denomination' or organization of congregations, confining it to the two senses of the Church universal, and an individual local society. The name has even come to be used to denote types or tendencies of thought or expression, within the one communion, as in the modern High Church, Low Church, Broad Church.

I. The building, the Lord's house.

1. a. A building for public Christian worship. (Distinguished historically from a CHAPEL or ORATORY, which is a building in some respect private, or not public in the widest sense.)

Ancient distinctions, retained more or less in the Churches of England and Scotland, are those of CATHEDRAL, COLLEGIATE, ABBEY, and PARISH or *parochial*, church. (See also METROPOLITAN.) Any place of worship subordinate to the public church of the parish was formerly called CHAPEL (q.v.); but *parochial* and *district chapels* are now usually called 'Church'. In England the name has been only recently and partially extended to places of worship other than those of the national or 'Established' Church, as those of Roman Catholics (since *c* 1830–40) and some Nonconformist Protestants. At present, its application is partly a question of social or individual taste, or of ecclesiastical principle or theory, partly (in popular apprehension) of the size and architecture of the building. Thus, some would limit it to the historical place of worship of the parish, some extend it to all places of worship of that body which they recognize as 'The Church', and refuse it to all others; some would require the existence of certain features of ecclesiastical architecture. But, generally speaking, in England the question 'Is this a church or a chapel?' would at present be understood to mean 'Does it belong to the Church of England or to some other religious denomination?'

In Scotland, *church* is applied to all Presbyterian places of worship, alike of the Established Church, and of the various voluntary bodies which have separated from it. Recently also extended to the chapels of Episcopalians, Roman Catholics, Independents, and others generally.

In U.S. *church* is, in general use, applied to all places of worship. Episcopalians however sometimes claim it exclusively for their own; and other bodies in some cases use special names for their own buildings. In the British colonies generally, the usage of England and Scotland is combined, with more or less extension as in the U.S.

9. ***High, Low, Broad Church***: see these words.

Although *church* is here practically equivalent to 'church party', 'section of the church', it has acquired this force only contextually or by unthinking analysis of phrases in which *high church-*, *low church-* were used attributively, as in *high church-man* and the like. *Broad church* is a modern formation on the model of the other two, starting not from their starting-point, but from their current use.

III. 10. A congregation of Christians locally organized into a society for religious worship and spiritual purposes, under the direction of one set of spiritual office-bearers.

(The early examples of this, before 16th c., are perhaps all in translations of the N.T. or references thereto.)

VI. *Attrib.* and in *Comb.*

15. *attrib.* There being no adjective from *church* in general use, and the genitive *church's* being restricted to the notion of possession (usually with more or less personification), as in 'the church's claims, revenues, ministrations', the place of both is supplied by using *church* attributively or with the function of an adjective, signifying 'of the church, of a church, of churches, ecclesiastical'. In such a use, the word is often hyphened, though the value of the hyphen is merely grammatical, in no way affecting the signification, and it may usually be omitted.

Church may be thus used in most of the senses above explained: in England it has specifically the sense 'of the Church of England'.

church-scot, -shot. Modernized adaptation of OE. ciric-sceat [f. OE. *ciric-* church- + *sceat* money-payment, tribute, rate], in 12th c. **church-scet**, which was subsequently, as an obsolete term, variously corrupted as 3 **chirchesset** (*ss* = *sh*), -soht, 4 **cherset**; and by legal antiquaries, 7 **churchesset**, 7– **church-seed.**

lit. = *church-tribute*: in OE. times a custom of corn collected on St. Martin's day; extended to other contributions in kind and money made for the support of the clergy, or demanded as a traditional ecclesiastical due.

The desire to connect the latter part of the combination with *seed* appears as early as the 13th c., when the institution and name were alike traditionary; hence the corruptions found in 13th c. documents, in Latin translations of OE. documents, and in the 17th c. legal antiquaries. Modern writers sometimes use the OE. name. (See SCOT, SHOT.)

The alleged OE. *ceren* is an error of Junius in Lye, carelessly repeated in Dictionaries since. The actual forms point to various types, *kernâ-*, *kirnjâ*, *kernôn-*, *kirnjôn-*. On the whole the strong forms appear to be WGer., the first being represented by Du. and Ger. *kerne*, *karn(e*, the second by Ger. *kirn(e* and OE. **cirn*, **ciern*, *cyrin*. The weak forms appear to be Scandinavian, ON. *kjarna-*, and the Du., Sw., and Da. pointing to *kernôn*, Icel. *kirna* to *kirnjôn-*. The ulterior etymology of *kirn-* is uncertain, but see Hildebrand in Grimm s.v. *Kernen* 3 *c*; it is not related to *cwern-*, *quern-*mill.]

ci-. Since *c* before *i* (as before *e*) was palatalized in OE, and in due course written *ch-* in ME., it follows that all OE. words in *ci-*, that have left representatives, now appear in the foregoing section of CH-, (e.g. *chicken*, *chide*, *child*, *chill*, *chin*, *chirm*). As a consequence CI- now contains only non-Teutonic words which have entered the language during the Middle English or the modern period, chiefly from Latin directly or through French. (The sole exception is the word CINDER, as now spelt, for OE. and ME. *sinder*; which also owes its current spelling and inclusion among the *ci-* words to erroneous identification with French *cendre*, Latin *cinerem*.) The words in *cy-* are also non-Teutonic, being mostly modern and of Greek origin. In these combinations *c* has normally the sound of *s*; in the remaining combinations, CL-, CO-, CR-, CU-, *c* has, as in CA-, its original phonetic value of (k), and comprises original English, as well as later words from all sources.

(The *κιβώριον* contained the 'nuts' or fruits called *κύαμος αἰγύπτιος*, *faba ægyptiaca*, or Egyptian beans; the rhizome or 'root' of the plant was called *κολοκασία*; both these names were also extended to the plant as a whole.)]

-cide (saɪd), *suffix.*
1. a. F. *-cide*, L. *-cīda* cutter, killer, slayer, f. *cædĕre*, in comp. *-cīdĕre* to cut, kill, as in *homicīda*, *parricīda*, *mātricīda*, *frātricīda*, *sorōricīda*, *tyrannicīda*, etc., slayer of a man, father, mother, brother, sister, tyrant, etc.; also *lapi(di)cīda*, stone-cutter, etc. Most of the L. words having the sense 'slayer, murderer', have come down into Romanic and English, where new combinations have also been formed on the same type, notably *regicide* and *suicide*; *filicide* has also been used; and many occasional forms appear as jocose nonce-words, e.g. *apicide*, *avicide*, *canicide*, *ceticide*, *muricide*, *perdricide*, *tauricide*, *vaticide*, *verbicide*; or, still more ludicrously, *birdicide*, *prenticecide*, *suitorcide*, etc. Also applied to preparations destructive of animal or vegetable life, as *algicide*, *fungicide*, *germicide*, *insecticide*, *pesticide*.
1866 *Lond. Rev.* 23 June 697/2 A charming garrulity far more attractive than the yarn of the venerable birdicide [the 'Ancient Mariner']. **1797** CANNING, etc. *Anti-jacobin* 20 Nov. (*heading*), Mrs. Brownrigg, the 'Prentice-cide'.
2. a. F. *-cide*, L. *-cīdium* cutting, killing, of same deriv. as 1; and, as the name of the action, possible wherever the name of the actor in *-cīda* was in use; e.g. *homicīdium*, *parricīdium*, *mātricīdium*, etc.; also sometimes independently as in *bōvicīdium* slaughter of oxen, etc. In

English, as generally used as sense 1, the two implying each other, as in 'the parricide is he who commits parricide', etc.

[ME. *sidre*, *siþer*, etc., a. OF. *sidre* (now *cidre*), corresp. to It. *sidro*, *cidro*; Sp. *sidra* fem., OSp. *sizra*. Although the phonetic history of the word in Romanic presents difficulties, there can be no doubt that it represents late L. *sicera* (med.L. *cisara*, *cisera*), Gr. *σίκερα*, a word used by the LXX, the Vulgate, and Christian writers to translate Heb. *shēkār* intoxicating liquor, 'strong drink', of the O.T., f. *shākar* to drink deeply or to intoxication. It is not clear where or how the phonetic change from *sicera* to *sidra* took place; but perh. the intermediate link was *sizra* (sitsra, sidzra): cf. F. *ladre* from *Lazarus*. In common use *cidre* had already acquired the sense of 'fermented drink made from apples' before it was taken into English. But the earlier sense of 'strong drink' generally was retained in translation of, and allusions to, the Vulgate; and in this sense the word had often forms much nearer to the Latin, as *ciser*, *cisar*, *cyser*, *seser*: these forms are not used in the sense 'cider': see SICER.]

cigar (sɪ'gɑ:(r)). Forms: 8 seegar, cegar, seguar (sagar), 8–9 segar, 9– cigarre, cigar. [ad. Sp. *cigarro*: in F. *cigare*.

The Spanish word appears not to be from any lang. of W. Indies. Its close formal affinity to Sp. *cigarra* 'cicada', naturally suggests its formation from that word, esp. as derivatives often differ merely in gender. Barcia, *Great Etymol. Spanish Dict.*, says 'el cigarro figura una cigarra de papel' (the cigar has the form of a cicada of paper). Mahn also thinks that the roll of tobacco leaf was compared to the body of the insect, which is cylindrical with a conical apex. The name *cigarral* applied to a kind of pleasure-garden and summer-house (as in the cigarrales of Toledo), which has sometimes been pressed into service in discussing the etymology, is said by Barcia, after P. Guadio, to be related neither to *cigarra* nor *cigarro*, but to be of Arabic origin meaning 'little house' (*casa pequeña*). It is said however to be applied in Cuba to a tobacco garden or nursery.]

cinchona (sɪŋ'kəʊnə). Also **chinchona.** [Named in 1742 by Linnæus in honour of the Countess of Chinchon (in Spain), who in 1638, when vice-queen of Peru, was cured of a tertian fever by the use of Peruvian bark, and in 1640 brought a supply of it to Spain, whence it became known throughout Europe. On the ground that Linnæus's form *Cinchona* was due to erroneous information, it has been proposed to alter it to *Chinchona*; but the accepted form is too deeply rooted in botanical and chemical nomenclature to make this expedient. The word has no etymological connexion with *quina*, which is Peruvian for 'bark': see however CHINA³.]

Cinque Ports. [In 13th c. *sink pors* repr. OF. *cink porz*, Latin *quinque portus*, five ports.]

A group of sea-ports (originally five, whence the name) situated on the south-east coast of England, and having jurisdiction along the coast continuously from Seaford in Sussex, to Birchington near Margate, including also Faversham, which have existed as an incorporation from an early period of English history.

The five 'Ports' are in order of precedence Hastings, Sandwich, Dover, Romney, Hithe, to which were added in very early times the 'Ancient Towns' of Rye and Winchelsea, with all the privileges of 'Ports'. Several of these have detached 'Members', of which Seaford, Pevensea, Fordwich, Folkstone, Faversham, Lydd, Tenterden, Deal, and Margate, are 'Corporate Towns' with the same jurisdiction and municipal functions as the parent Ports.

In ancient times the Cinque Ports furnished the chief part of the English navy, in return for which they had many important privileges and franchises. These were mostly abolished by the Reform Act of 1832 and the Corporation Act of 1835. The Lord Wardenship is now chiefly an honorary dignity, and is usually conjoined with that of Governor of Dover Castle. See Vol. I of the Census Returns for 1871, and M. Burrows *Cinque Ports*.

circum- (sɜ:kəm). A Latin adv. and prep. meaning 'around, round about', much used in composition with verbs, and hence with the sbs. and adjs. formed from them, as in *circumambulāre* to walk about, *circumflectĕre* to bend round, *circumflexus* bent round, *circumflexio* a bending round, etc. Only a few of these survived in OF. (e.g. *circoncire* to circumcise, *circonscrire* to circumscribe) and passed thence into Eng. (with *circon-*, *circun-*, *circum-*); but a large number of words adopted from or formed on the Latin, or in accordance with L. analogies, have arisen in modern French, and still more in English, where the analogy has occasionally been extended by prefixing *circum-*, as a living element, to native or naturalized verbs; e.g. *circumbind*, *circumflow*, *circumzoned*.

A much rarer Latin use (which was however common in Gr. with περί) was in parasynthetic derivatives from *circum* prep. + *sb.*, forming adjectives, as in *circumpadānus*, (f. *circum Padum*) lying round the Po, *circummurānus* around the walls, *circumforāneus* around the forum, *circumcordiālis* Tertull. = περικάρδιος, around the heart. This has proved a fruitful analogy for modern compounds, e.g. *circumpolar*, *circumlittoral*, etc.

All important words in *circum-* will be found in their alphabetical places as main-words; but a number of less important or trivial words are collected here, under their respective types.

1. circumflex ('sɜ:kəmflɛks), *a.* and *sb.* [As adj., ad. L. *circumflex-us* bent about, pa. pple. of *circumflectĕre*; as applied to the accent, it translated Gr. *περισπώμεν-ος*, lit. 'drawn around', in reference to its shape. The sb. is partly an absolute use of the adj., partly (senses 2, 3) repr. L. *circumflexu-s* a bending round.]

A. *adj.*

1. *Gram.* A word meaning literally 'bent round' applied to an accent-mark ^, ˆ, or ~, placed, originally in Greek, over long vowels having a particular accent or 'tone' (see ACCENT 1); and thence transferred to other languages as a mark of length, of contraction, or of a particular variety of long vowel. Sometimes also applied to the tone, quantity, or quality indicated by this mark.

The Greek *περισπώμενος* was used by Dionysius of Halicarnassus, B.C. 30 (*περισπώμεναι λέξεις*). According to Arcadius *περὶ τόνων* (*c* 200 A.D.), prob. copying Herodian (*c* 150 A.D.), the sign and name are both attributed to Aristophanes of Byzantium (*c* 264 B.C.). The original mark is said to have been ^ a combination of ´ and `, and hence called *ὀξυβάρεια*, for which however Aristophanes is said to have substituted ^ to avoid confusion of ^ with Lambda (*Λ*). This statement proves at least that the rounded form was the common one *c* 200. In our oldest accented texts (7–9th c.) both forms ^ and ˆ exist, but the rounded form prevailed, and by later scribes was turned up with a flouris, thus ~.

The Latin grammarians of 2–3d c. call the mark *circumflexus*, and generally agree as to its shape being ^ (exc. Capella who used ˆ); but it was not actually used in writing Latin till modern times, when sometimes introduced to indicate contraction as in *amârunt* for *amaverunt*, or in the ablative sing. *in -â*. In recent times also it has been introduced in French to mark a long vowel, chiefly due to contraction, as in *bête* from *beste*. The circumflex used in normalized printing of Old High German, and other Teutonic langs., to express long quantity, originated in an acute accent ´ (as in O.E.), which being thus made ˊ, has been confounded with the Romanized form of the circumflex.

In modern English use the mark has no definite value, but is variously used by orthoepists or phonetists to mark long quantity, 'broad' quality, or the like.
